

Change Notification June, 2010

Dear Valued Customer:

Mediatech, Inc. would like to inform all of our customers that Mycoplasma Testing, previously subcontracted to Southern Illinois University (SIU), and used as a release specification for many products, will now be performed by Bionique Testing Laboratories, Inc-Saranac, NY. The test method to be used by Bionique is equivalent to the method that was employed by SIU. Quality Assurance has approved the use of Bionique as a subcontracted lab, per the Supplier Approval Program Procedure.

Mediatech makes every effort to ensure the integrity and quality of our products before and after they leave our facility. The on-site product specification review program enables Mediatech to monitor test results and overall product integrity on a continuous basis and make adjustments as needed.

If you have any questions or concerns regarding this specification change, please do not hesitate to contact our Technical Support department.
