

Change Notification

June, 2011

Dear Valued Customer:

Mediatech will begin utilizing a new outer drum to be used with our 200L flexible containers.

This drum is manufactured under ISO 9001:2000 and made of high density polyethylene. The drum passed ISTA testing for orientation, vibration, and shock testing.

Mediatech is adding this new drum to be used with our standard catalog 200L flexible containers. This change is to take effect immediately upon depletion of our 200L drum part 05.211.

The Mediatech Standard Catalog part numbers affected by this change are:

25-055-LH	Sterile WFI-Quality Cell Culture Grade Water
25-065-LH	USP/EP Certified Sterile WFI-Quality Water

Mediatech makes every effort to ensure the integrity and quality of our products before and after they leave our facility. The on-site product specification review program enables Mediatech to monitor test results and overall product integrity on a continuous basis and make adjustments as needed.

If you have any questions or concerns regarding this specification change, please do not hesitate to contact our Technical Support department.
